Art Unit: 3634

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schlecht et al '375 in view of Lichy. Schlecht et al '375 disclose a roller shade assembly comprising a winding shaft 32, a pull rod arrangement 36,39, a guide rail 19,21 the walls and back 23-25 of which respond to the claimed flanges. While Schlecht et al '375 do not disclose an elastic lip, Lichy discloses a roller assembly comprising a guide rail having an elastic lip 62,66,58,56,48,90,94, wherein, to incorporate this teaching into the roller shade assembly of Schlecht et al '375 for the purpose of sealing the guide rail would have been obvious to one of ordinary skill in the art.
